Riding Equipment

SIZING CHART

HOW TO MEASURE

Regarding size:

Due to the differences in brand size systems and styles, the size may be larger, smaller or normal. We will do our best to provide more detailed product parameter information. The corresponding size chart can only provide the standard size for EUR or US mannequins. The final decision is made by you after trying it on.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

① HEAD

Around your head, from the center of the forehead, above the ear and over the natural bump at the back of the head.

② ARM LENGTH

Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

③ CHEST / BUST

Measure under your arms, around the fullest part of your chest.

④ WAIST

Measure around your natural waistline, keeping one finger between the tape and body.

⑤ HIPS

Across the widest part of the seat.

⑥ INSEAM

Without shoes, from the crotch to the floor.

HELMET.
